MELTING & CASTING
TECHNOLOGIES

The Company

cunova offers a unique combination of know-how and experience in all key technologies for the production of high-performance moulds for casting ferrous alloys.

cunova's corporate goal is to develop and manufacture products that meet customer demands, finding solutions for their specific applications, and providing services as a long-term partner. cunova's strategy for accomplishing this goal is based on a highly skilled and experienced workforce. cunova has the ability to invent and develop new materials and innovative production processes via ongoing advancement and training of our employees and the continual improvement of its organisational structures.

AMT® ADVANCED MOULD TECHNOLOGY

Round WAVE®

Challenge

- Improve billet shape and internal quality

Solution

- Special internal "WAVE®" geometry

Application

- Round moulds in all copper alloys
- All types of hot face coatings
- Compatible with existing equipment
- For oil and powder casting

Advantages

- Improved product quality due to better strand guidance in the mould
- Decreased billet ovality
- Reduction in depression and longitudinally cracks
- Increased mould lifetime
